Danish Qureshi

Full Stack Developer | Java, Spring Boot & React

danishq | danishqureshi08 | dqureshi08@gmail.com | +91-9829798737

Professional Summary

Full Stack Developer with 2.5+ years of experience building production applications using **Java, Spring Boot, React, and TypeScript**. Experienced in REST API development, database optimization, third-party integrations, and secure authentication. Hands-on experience building visual editors, browser-based push notification systems, and WordPress integrations, with additional exposure to Docker, Linux, and automation.

Professional Experience

AdFlipr | Full Stack Developer Aug 2025 – Present

- Developed production backend services using **Java 21 and Spring Boot**, building REST APIs, business workflows, JWT authentication, and third-party integrations with Mailgun and Razorpay.
- Designed and optimized **MongoDB and Elasticsearch queries**, including complex filtering and aggregations, and worked with CDC pipelines for data synchronization and analytics workflows.
- Built and enhanced frontend applications using **React, TypeScript, and GrapesJS**, developing email and popup builders with HTML/CSS serialization, responsive rendering, preview, and export functionality.
- Implemented a browser-based **Web Push Notification system** using JavaScript Service Workers, Push API, and VAPID, integrating frontend subscription flows with Spring Boot backend services.
- Developed a **WordPress/WooCommerce integration plugin** with REST APIs, webhook processing, automation, authentication, and event tracking for products, orders, checkout, and abandoned-cart workflows.
- Automated operational workflows using **Bash, Python, and cron jobs**; configured Docker-based MongoDB and Elasticsearch environments and provisioned Oracle Cloud Linux VMs.

The Mangrove Life | Frontend Developer Mar 2024 – Jul 2025

- Developed responsive and reusable UI components using **React.js, JavaScript, HTML, and CSS**, focusing on component reusability and maintainable frontend architecture.
- Implemented application state management using **Redux**, managing UI state and data flow across components.
- Integrated **REST APIs** with frontend components to fetch, process, and dynamically render application data.
- Built responsive layouts using **Tailwind CSS**, debugged UI issues, and improved cross-device usability and frontend reliability.

Projects

AdFlipr for WooCommerce | PHP, WordPress, WooCommerce, REST APIs

- Developed a WooCommerce integration plugin connecting online stores with the AdFlipr SaaS platform for product, order, checkout, revenue, and abandoned-cart event synchronization.
- Implemented WordPress REST API endpoints, webhook processing, authentication, and event handling for marketing automation workflows.
- Published the source code on GitHub under the **GPL license** for open-source distribution through the WordPress plugin ecosystem.
- **GitHub:** github.com/devadflipr/adflipr

Notes Management System | Spring Boot, React, PostgreSQL

- Built a full-stack notes application with Spring Boot REST APIs, React frontend, and PostgreSQL persistence using Spring Data JPA.
- Implemented secure authentication and authorization using Spring Security and token-based authentication, with complete CRUD functionality.

AI-Assisted Codebase Intelligence | Graphify, Python, Antigravity

- Integrated **Graphify** across four repositories (React, Spring Boot, WordPress, and Shopify), generating individual and unified codebase knowledge graphs.
- Mapped relationships between files, functions, imports, and dependencies to enable cross-repository code navigation and end-to-end execution flow analysis.
- Configured **Graphify MCP integration** with Antigravity, enabling AI coding agents to access repository knowledge graphs and retrieve codebase context for intelligent code exploration and dependency analysis.

Education

2022 – 2024	**Master of Computer Applications (MCA) – Data Science**, JECRC University, Jaipur	CGPA: 7.2
2019 – 2022	**Bachelor of Science (BSc) – Mathematics**, Jiwaji University, Gwalior	CGPA: 6.9

Technical Skills

Languages	Java, JavaScript, TypeScript, Python, PHP, Bash
Backend	Spring Boot, Spring Security, REST APIs, JWT, Webhooks, CDC
Frontend	React.js, Redux Toolkit, HTML, CSS, i18n, Service Workers, Web Push API
Databases & Search	MongoDB, PostgreSQL, Elasticsearch, Kibana
Integrations	Mailgun, Razorpay, WordPress, WooCommerce
Infrastructure & Tools	Docker, Linux, Oracle Cloud, Git, Cron Jobs, Graphify, Model Context Protocol (MCP)
